GuardXel — Brand Discovery & Creative Direction Questionnaire

How to complete this questionnaire?

Please answer as clearly and honestly as possible. Short answers are fine where appropriate; add detail wherever you can. - If a question does not apply yet, write **"Not decided"**. If the answer is confidential, note that and share only what is appropriate. You may attach existing presentations,product sheets, packaging dielines, research, competitor links, photos, and other reference material. There are no "right" answers. The aim is to understand the business not to push you toward a predetermined design. This is a discovery document. Research, competitor analysis, and creative direction will follow after the responses are reviewed.

1. Business Overview

1. What is GuardXel?

Describe GuardXel in your own words. What does the business do, and what does it offer customers?

Answer:

GuardXel is a premium device protection brand focused on safeguarding smartphones, tablets, laptops, wearables and other connected devices through advanced protection technologies, precision installation systems and customer-first assurance programmes.

More than a product company, GuardXel is being built as a device protection ecosystem designed to help consumers protect the devices they depend on every day while delivering confidence, convenience and long-term value.

2. What is the story behind starting GuardXel?

What inspired the idea, and what problem or opportunity led to the business?

Answer:

GuardXel was born from the belief that consumers deserve a better device protection experience.
After more than a decade of sourcing products globally, building brands in international markets and understanding consumer behaviour firsthand, we recognised a significant gap in the Indian market. While consumers were investing heavily in premium devices, the protection category remained fragmented, inconsistent and largely driven by low-cost solutions.
GuardXel was created to raise the standards of the category by combining premium materials, precision technology, trusted retail partnerships and customer assurance into one integrated protection experience.

3. What stage is the business currently at?

Product development & Pre Launch

4. What is the current business model?

How will GuardXel earn revenue product sales, service fees, kiosk transactions, retail partnerships, subscriptions, B2B contracts, or a combination?

GuardXel follows an asset-light, scalable distribution model focused on rapid retail penetration and strong channel partnerships.
The initial launch strategy is focused on South India using a Super Stockist, Distributor and Retailer network supported by GuardXel precision plotter systems. The objective is to establish a strong retail footprint across Kerala, Tamil Nadu, Karnataka, Andhra Pradesh and Telangana.
Parallelly, GuardXel is pursuing partnerships with leading organised retail chains, including large-format consumer electronics retailers, while building a direct-to-

consumer presence through selected product categories available online.
The long-term vision is to create a nationwide device protection ecosystem connecting consumers, retailers, service providers and assurance programmes.

5. What are the main products and services today?

List each product or service, including its purpose and current availability.

GuardXel offers a professionally managed device protection ecosystem centred around premium film-based protection solutions and precision installation technology.

The current product range consists of three protection tiers:

GuardXel Shield

Everyday premium protection.

GuardXel Edge

Enhanced protection with improved impact absorption and durability.

GuardXel Titan

Maximum protection for consumers seeking the highest level of confidence.

Products are supported through precision plotter technology capable of creating device-specific protection solutions for smartphones, tablets, laptops, smartwatches and other compatible devices.

The product ecosystem is further supported through selected tempered-glass solutions, installation services and future device-assurance programmes.

6. What products or services may be introduced in the next 1-3 years?

Include planned extensions, new device categories, services, or technology.

Over the next one to three years, GuardXel intends to evolve from a product-centred company into a comprehensive device protection ecosystem.
Future initiatives may include:
Advanced protection solutions with integrated assurance programmes.
Digital warranty registration and validation systems.
Retailer and service-provider technology platforms.

Screen repair and replacement support networks.
Device care membership programmes.
Expanded protection categories for emerging device segments.
Curated mobile-accessory categories aligned with the GuardXel quality promise.
The objective is to create a seamless protection experience extending beyond installation into the complete lifecycle of device ownership.

7. What are the most important business goals for the next 12 months?

List the top three to five goals, in order of priority.

Over the next 12 months, GuardXel's key objectives are:
Establish presence across 1,000 retail outlets in South India.
Secure partnerships with at least two leading organised retail chains.
Build strong retailer advocacy and product awareness.
Launch GuardXel's digital brand presence.
Create a scalable foundation for national expansion.
Position GuardXel as a premium and trusted name within India's device protection category.

8. What would make this branding project successful for GuardXel?

Describe the business outcomes you want the new brand identity to support.

Answer: This branding project will be successful if GuardXel becomes instantly recognizable and credible within the gadget protection industry while creating a distinctly premium position that is difficult to copy. The identity should help build trust among consumers, strengthen retailer acceptance, support national expansion, and provide a scalable foundation for future products and services. Success means customers asking for GuardXel by name and retailers viewing it as a premium profit-generating category rather than another screen-protection product.

2. The Problem, Product & Customer Value

9. What customer problem does GuardXel solve?

Describe the situation customers face before they discover GuardXel.

Answer: Consumers invest heavily in smartphones, tablets, laptops, watches and other connected devices yet rely on low-quality, inconsistent protection solutions that often fail to deliver the promised experience. The market is fragmented, confusing and dominated by products that prioritise price over performance. Customers struggle to find protection they can genuinely trust.

10. Why is this problem important to solve?

What inconvenience, risk, cost, frustration, or lost opportunity does it create?

Answer: Devices today carry personal memories, financial data, business communications and everyday digital interactions. Damage, scratches and reduced usability create frustration, replacement costs and inconvenience. Consumers deserve protection solutions that preserve both the function and value of their devices.

11. How does GuardXel solve the problem?

Explain the product or service experience from the customer's point of view.

Answer: GuardXel combines premium protection materials, precision plotter technology, trained retail partners and customer assurance programmes into a single experience. Customers receive device-specific protection solutions designed to deliver superior aesthetics, touch experience, durability and peace of mind.

12. What makes GuardXel's solution different from existing alternatives?

Consider convenience, speed, quality, availability, technology, service, price, or reliability.

Answer: Unlike brands that compete primarily on price, GuardXel focuses on delivering a complete protection ecosystem. This includes premium materials, precision-cut installation, structured product tiers, retailer support, warranty programmes and future device protection services. The objective is to provide a trusted protection experience rather than simply sell a screen protector.

13. What are the strongest benefits for customers?

Separate **functional benefits** (what it does) from **emotional benefits** (how customers feel).

Answer:

Strongest Benefits

Functional

Superior impact absorption

Precision-fit installation

Self-healing surface technology

Better screen clarity and touch response

Device compatibility across multiple categories

Warranty-backed protection

Emotional

Peace of mind

Confidence in daily use

Pride of ownership

Trust

Reduced anxiety from accidental damage

14. What proof supports the product's claims?

For example: material specifications, testing, warranties, performance data, demonstrations, certifications, or customer feedback. Please distinguish verified claims from planned claims.

Answer: Right now the warranty.

1 Year Unlimited Film Replacement For Any Issue. Any Damage. Any Usage. Just a Minimal Replacement Fee.

- Only Requirement is the applied film should remain on the screen while claiming warranty. This will be peeled off by the salesman - Only then the replacement will be in effect.

- No questions asked
- No conditions
- No hidden clauses
- Always a fresh screen, anytime you want

This is not just a warranty — it's a **new standard of customer experience.**

Product specification - Quailty benchmarks already provided in the presentation. Testing benchmarks and videos to articulate quality can be prepared and shared.

15. What concerns might stop someone from buying or using GuardXel?

Answer: Being the new entrant and price points. Hence trust, product quality and uncertainity of the process will be the key to be addressed

16. What should customers understand immediately when they first encounter GuardXel?

If they remember only one thing, what should it be?

Answer:
GuardXel protects the devices you depend on most through premium protection solutions engineered for confidence, performance and peace of mind.
If they remember one thing: GuardXel is protection you can trust.

3. Products, Technology & Operations

17. Which devices or product categories will GuardXel support?

List supported device types, brands, models, sizes, and any known compatibility limitations.

Answer:

GuardXel is designed to support a broad spectrum of connected devices through precision-cut installation technology.
Current and planned device categories include:
Smartphones

Tablets
Laptops
Smartwatches
Foldable devices
Car display screens
The objective is to ensure broad compatibility while maintaining installation precision and product performance across all supported device categories.

18. What exactly is included in each product or service?

Describe the contents, materials, installation, support, warranty, and any additional items.

Answer: All provided in the 3 product specification in the presentation for Shield / Edge & Titan

19. How does a customer purchase and use the product?

Walk through the experience from discovering GuardXel to purchase, installation or application, and after-sales support.

Answer:

Customers will typically encounter GuardXel while purchasing a new device, upgrading an existing protection solution or seeking a premium alternative to conventional tempered glass products.
The journey includes:
Product discovery through retail partners, organised retail chains or digital channels.
Selection of the most suitable protection tier.
Precision installation using GuardXel plotter technology.
Product registration and warranty enrolment where applicable.
Ongoing support through participating retailers and future digital service platforms.
The objective is to provide a seamless and professional protection experience from purchase through after-sales support.

20. What quality, safety, durability, or performance standards matter most?

List any applicable internal standards, certifications, testing requirements, or regulatory requirements.

Answer: How we prove the product can withstand impact resistance is through a drop test with a steel ball dropped from different heights on a product applied phone and what % of attempts and height it remained competent . Then water drop angle test which specify the smoothness and scratch resistance of the product - before and after 3000 to 5000 times of scratching the product before and after the application. The edge pressure resistance - 10 to 30KG

21. What warranties, replacements, returns, or after-sales services will be offered?

Already provided above

Answer:

22. What operational limitations should the brand team know about?

Consider inventory, manufacturing, suppliers, installation time, staffing, locations, maintenance, or service capacity.

Answer: Installation time - But this need to be educated properly with innovative techniques

23. Which product facts must always be communicated accurately?

List technical specifications, compatibility information, exclusions, warnings, or other details that must not be simplified incorrectly.

Answer: When a phone dropped from side angle and the impact of fall is on the side of the phone irrespective of the protection used the LCD will break.

24. Are there any planned partnerships or integrations?

For example: device retailers, airports, metro operators, malls, electronics stores, telecom companies, or technology partners.

Answer:

GuardXel intends to develop strategic partnerships across the device-protection ecosystem.

Priority partnerships include:
Consumer electronics retailers.
Organised retail chains.
Mobile-device retailers.
Repair and service networks.
Technology solution providers.
Future warranty and assurance partners.
These partnerships are intended to strengthen accessibility, service quality and customer confidence across the GuardXel ecosystem.

4. Audience & Buying Behaviour

25. Who is the primary customer?

Describe the most important audience in terms of age range, needs, device usage, lifestyle, location, and buying context where relevant.

Answer : Smartphone users aged 25-45 who value their devices and seek premium protection, reliability and long-term value. This includes professionals, entrepreneurs, technology enthusiasts, premium device owners and customers purchasing new devices through organised retail channels.

26. Who are the secondary audiences?

List any other customer groups or business buyers GuardXel needs to serve.

Answer: Any other customer who buy a phone which is worth 10k and above . Important conversion time is during the investment is made (while buying) or during an impact already happened due to lcd breakage (during repair) or naturally when they step into a store seeking a better solution for protecting his device.

27. **Is GuardXel primarily B2C, B2B, or both?**

Explain who uses the product, who pays for it, and who makes the purchasing decision.

Answer: Both. End users experience the protection solution while purchasing decisions are strongly influenced by retail partners, distributors and organised

retail chains. GuardXel therefore serves both consumer and trade audiences within an integrated ecosystem.

28. In what situations will customers most likely need GuardXel?

For example: buying a new device, replacing damaged protection, travelling, commuting, shopping, or using a public kiosk.

Answer: All of the above

29. What triggers a customer to look for this kind of solution?

Describe the moment, need, problem, or event that prompts a purchase.

Answer: The investment he made for the phone . Any issue or disruption he had by damaging his phone screen.

30. What matters most when customers choose a product like GuardXel?

Rank the most important factors: protection, quality, convenience, speed, compatibility, price, trust, appearance, warranty, or something else.

Answer:

Rank:
Trust
Protection Performance
Product Quality
Appearance And Touch Experience
Warranty
Compatibility
Convenience
Brand Reputation
Price

31. What questions or objections do customers commonly have?

If the business has not launched, what questions do you expect customers to ask?

Answer: na

32. What should a customer feel before, during, and after using GuardXel?

Describe the ideal emotional experience at each stage.

Answer: Before : worry During : happy for getting a trustable and reliable brand. After : Peace of mind

5. Markets, Geography & Growth

33. Which markets or locations will GuardXel target first?

List priority cities, regions, or countries and explain why they are priorities.

Answer:

GuardXel will initially focus on South India, beginning with:
Kerala
Tamil Nadu
Karnataka
Andhra Pradesh
Telangana
These markets have strong smartphone adoption, organised retail presence and well-established distribution ecosystems.
The long-term objective is national expansion followed by selected international opportunities.

34. Where will customers encounter the brand?

For example: kiosks, vending machines, airports, metro stations, malls, retail stores, websites, social media, partner locations, or sales presentations.

Answer: Retail Stores , Chain and large format stores and websites. Plus social media

35. Which location types are most important for the first launch?

Rank the intended locations and explain any operational or audience considerations.

Answer: Explained above

36. What languages should the brand support?

Include languages needed for packaging, signage, kiosks, instructions, website content, or customer support.

Answer: English plus the local language for broader communication wherever needed

37. Are there cultural, regional, accessibility, or local-market considerations?

Mention any symbols, colors, words, imagery, or design conventions that should be used carefully or avoided.

Answer: na

38. What is the long-term expansion plan?

Where and how do you expect GuardXel to grow over the next three to five years?

Answer: To become India's most trusted device protection ecosystem, setting the standard for quality, innovation, and customer confidence across every connected device.

6. Competitors & Alternatives

39. Who are GuardXel's direct competitors?

List known companies offering similar products or services, with links if possible.

Answer:

Cheap Local Film Sellers

This is actually the biggest volume competitor.

Every city has:

Mobile accessory stores

Generic hydrogel suppliers

Local distributors

Unbranded plotter operators

These people typically sell:

₹99–₹299 products

Tempered Glass

This is where 91% of the current market sits

Do NOT attack tempered glass.

Right way

Traditional Protection vs Smart Protection

This changes the frame completely.

40. Who are the indirect competitors or alternatives?

Consider traditional screen-protection sellers, repair shops, online marketplaces, device accessories, DIY solutions, or doing nothing.

Answer:

Existing Film Brands

These are our direct strategic competitors.

Examples:

Gadgetshieldz

Gadgetwraps

InvisibleShield

ProtectionPro

Hydrogel providers

(Market-specific competitors may vary regionally.)

41. Which competitors do you admire, and why?

Consider branding, product experience, service, communication, distribution, or customer trust.

Answer: Tempered Glass - This segment is 91% of the total protection industry - Purely based on the belief :- Glass thickness will protect their screen much better than films - If this myth is broken with quality product in films - Every retailer will be more than happy to get way with the headache of inventory (Imagine to have at least 3 to 5 units of tempered glass model wise inventory of existing and running 2500 plus models available in market ? instead one machine and films replaces this huge headache- Its just a matter of trust

42. Which competitors do you not want GuardXel to resemble?

Explain what feels wrong or unsuitable about their positioning or visual identity.

Answer: Cheap solution with no quality

43. What does the market currently do well and what does it do poorly?

Share your observations about product quality, customer experience, pricing, availability, branding, or service.

Answer: There in no clear distinction or benchmark to rely on a brand or product for the consumer except believing what the retailer say - to choose which one is good over the other apart the price tag.

44. What gap or opportunity can GuardXel own?

What could the brand do or communicate that competitors are not doing effectively?

Answer:

The market lacks a trusted, organised and premium device-protection brand that combines product quality, retailer confidence, customer assurance and ecosystem thinking. GuardXel has the opportunity to own the space between commodity screen protectors and premium device ownership confidence.

45. Are there competitors whose names, logos, colors, symbols, or packaging could be confused with GuardXel?

Share any known risks or similarities.

Answer: No

46. What should distinguish GuardXel in a crowded marketplace?

Answer: Modern devices have become extensions of our lives, carrying our memories, work, relationships, and identities. GuardXel exists to protect the devices people depend on every day, giving them the confidence to use technology without fear of damage, compromise, or unnecessary replacement costs.

7. Positioning & Brand Foundation

47. Why should GuardXel exist beyond making sales?

Describe the larger purpose or change the business wants to create.

Answer: GuardXel exists to remove uncertainty from device ownership. As devices become increasingly central to work, communication and everyday life, consumers deserve protection solutions that are reliable, transparent and engineered to preserve both functionality and value.

48. What is GuardXel's vision?

What would you like the business to become or achieve in the long term?

Answer: To become India's most trusted device protection ecosystem and the preferred protection brand for every connected device.

49. What is the mission?

What does GuardXel do, for whom, and how does it deliver value?

Answer: To deliver world-class device protection solutions through innovation, precision technology, premium materials and customer-first experiences.

50. What core values should guide the business?

Choose three to five values and explain what each means in day-to-day behavior.

Answer:

- Protective
- Reliable
- Trustworthy
- Reassuring
- Strong

Message:

"We've got you covered."

51. What is GuardXel's clearest point of difference?

What is the one meaningful reason customers should choose GuardXel over alternatives?

Answer:

GuardXel combines premium protection materials, precision installation technology, structured product architecture, retailer enablement and customer assurance into one integrated protection ecosystem.

- Precision
- Engineering
- Technology
- Continuous improvement

Message:

"Protection made smarter." “ Ultimate peace of mind”

52. What promise should the brand consistently deliver?

What can customers reasonably expect every time they interact with GuardXel?

Answer: Every GuardXel product and service will deliver dependable protection, premium user experience and complete peace of mind.

GuardXel is a premium device protection brand that helps consumers protect and preserve their devices through advanced protection materials, precision-fit technology, and industry-leading customer assurance programs.

Unlike generic screen protector brands that compete on price, GuardXel delivers confidence, consistency, and long-term value through a complete protection ecosystem.

53. What should GuardXel be known for in three years?

Describe the reputation you want among customers, partners, and the wider market.

Answer: To become India's most trusted device protection ecosystem, setting the standard for quality, innovation, and customer confidence across every connected device.

54. Are there any beliefs or principles GuardXel will never compromise?

Include product standards, customer treatment, business ethics, or communication principles.

Answer: Never compromise quality to compete

8. Brand Personality & Voice

55. If GuardXel were a person, how would you describe its personality?

Choose a few traits and explain them for example: confident, practical, precise, reassuring, innovative, friendly, premium, or bold.

Answer:

GuardXel would be a confident, dependable and highly competent professional. It is reassuring without being passive, innovative without being overly technical, and premium without appearing elitist. It inspires confidence through its actions rather

than bold claims. It is the trusted expert consumers turn to when they want the best protection for their valuable devices.

Key personality traits:

- Trustworthy
- Precise
- Protective
- Innovative
- Premium
- Dependable
- Modern

56. Which personality traits should GuardXel avoid?

For example: childish, overly technical, aggressive, cheap-looking,intimidating, generic, or overly futuristic.

Answer:

GuardXel should never appear:

- Cheap or discount-focused
- Aggressive or intimidating
- Overly technical and difficult to understand
- Generic technology-focused
- Playful or childish
- Trend-chasing
- Flashy without substance

The brand should feel timeless and credible rather than fashionable.

57. How should the brand sound when it communicates?

Describe the desired tone across packaging, kiosk instructions, website,social media, and business communications.

Answer:

GuardXel should communicate with clarity, confidence and authority.

The tone should be:

- Professional but approachable
- Knowledgeable but never arrogant
- Premium but accessible
- Reassuring rather than fear-driven

Customers should feel guided by an expert rather than sold to by a salesperson.

58. What level of technical language is appropriate?

Should communication be simple for everyday consumers, more technical for partners, or adapted for each audience?

Answer:

Communication should adapt based on the audience.

For consumers:

- Simple
- Benefit-driven
- Easy to understand

For retailers and partners:

- Technical specifications
- Materials
- Performance claims
- Installation and operational benefits

The end consumer should buy confidence, not technical jargon.

59. Are there existing taglines, key phrases, or messages?

Share current wording and indicate what is approved, provisional, or no longer suitable.

Answer:

Current provisional ideas:

- Protection You Can Trust
- Precision Protection. Total Peace of Mind.
- Beyond Protection
- Protect More Than A Screen
- Protection Without Compromise

Final tagline currently used is Ultimate Device Protection

60. Are there words, claims, or expressions the brand must use or avoid?

Include legal, technical, cultural, or internal preferences.

Answer:

Must use wherever appropriate:

- Protection
- Precision
- Confidence
- Trust
- Peace of Mind
- Reliability
- Premium
- Engineered

Avoid:

- Cheapest

- Budget
- Unbreakable
- Indestructible
- Guaranteed No Damage
- Unrealistic performance claims

Brand credibility should never be sacrificed for marketing exaggeration.

9. Naming, Logo & Visual Direction

61. What does the name "GuardXel" mean or communicate to you?

Explain its origin, intended pronunciation, meaning, and any associations behind the name.

Answer:

GuardXel combines two ideas:

"Guard" represents protection, safety, security and reliability.

"Xel" is derived from the digital and technology world, symbolizing modern devices, pixels, precision and innovation. To a good extend Excellence

Together, GuardXel represents intelligent protection for the modern digital lifestyle.

62. Must the brand always appear as "GuardXel"?

Are there rules for capitalization, spacing, abbreviations, product names, or a possible descriptor such as a category line?

Answer:

Yes.

The preferred representation is:

GuardXel

The capitalisation should be maintained consistently as part of the identity system.

Future product architecture:

- GuardXel Shield
- GuardXel Edge
- GuardXel Titan
- Future sub-brands under the GuardXel ecosystem

63. What should the logo communicate at first glance?

Choose the most important qualities, such as protection, trust,precision, convenience, technology, or premium quality.

Answer:

The logo should communicate:

1. Trust
2. Protection
3. Precision
4. Premium Quality
5. Modern Technology

The mark should feel established, dependable and scalable.

64. Are there symbols, visual ideas, or references you would like explored?

Share the reason behind each reference. References are inspiration, not instructions to copy another brand.

Answer:

Possible exploration areas:

- Invisible protection
- Layered protection systems
- Precision engineering
- Dynamic energy fields

- Geometric strength
- Structural integrity
- Precision cutting patterns
- Modern device ecosystems

References should inspire thinking and not be copied directly.

65. Are there logo styles or visual clichés you want to avoid?

For example: obvious shields, locks, generic tech symbols, excessive gradients, or overly complicated marks. Explain your preferences.

Answer:

Avoid:

- Generic shields
- Padlocks
- Cybersecurity symbols
- Fingerprints
- Generic circuit-board graphics
- Stock technology symbols
- Overly complex iconography
- Excessive gradients
- Cheap gaming aesthetics

The mark should feel distinctive and ownable.

66. What visual style feels right for GuardXel?

Describe whether it should feel minimal, bold, premium, technical, approachable, industrial, modern, or something else. Explain the balance
you want.

Answer:

The ideal visual balance is:

- Premium
- Contemporary
- Sophisticated
- Clean
- Technically credible
- Minimal but powerful

The identity should feel equally comfortable on:

- Luxury smartphone packaging
- Retail displays
- Corporate presentations
- Digital platforms

Visual confidence should come from strong design discipline rather than visual noise.

67. Do you have color preferences or restrictions?

List preferred colors, colors to avoid, and any existing colors that must be retained. Explain why.

Answer:

Preferred exploration:

Primary Territory:

- Deep Midnight Blue
- Graphite Black
- Titanium Grey

Accent Exploration:

- Electric Blue
- Precision Cyan

- Metallic Silver

Colours should communicate trust, technology, protection and premium quality.

Avoid:

- Excessively bright colours
- Neon palettes
- Childish combinations
- Generic accessory-market colours

68. What should typography communicate?

For example: clarity, precision, approachability, technical credibility,strength, or premium quality. Mention any font preferences or
restrictions.

Answer:

Typography should communicate:

- Precision
- Reliability
- Modern technology
- Premium quality
- Clarity

Prefer contemporary sans-serif typefaces. But open for your creativity.

Typography should remain highly legible across:

- Product packaging
- Retail environments
- Digital applications
- Signage

69. How should the identity work at different sizes and in different environments?

Consider a small digital icon, packaging, a kiosk screen, large signage,uniforms, receipts, and low-light or high-traffic locations.

Answer:

The identity must function effectively across:

- Mobile app icons
- Website favicons
- Product packaging
- Plotter machine branding
- Point-of-sale displays
- Retail signage
- Uniforms
- Social media
- Exhibition booths

The system should remain recognisable even when reduced to a very small footprint.

70. Are there existing brand assets that must be retained, updated, or discontinued?

Share current logos, colors, fonts, packaging, presentations, social profiles, or other materials, and explain what should happen to each.

Answer:

The existing product architecture should be retained:

- Shield
- Edge
- Titan

The current strategic thinking around protection, trust and premium positioning should be evolved and strengthened.

All visual assets should be reviewed and refined through a professional identity system.

10. Brand Applications & Customer Touchpoints

71. Where will the logo and identity be used first?

Rank the most important applications, such as packaging, kiosks, vending machines, signage, website, social media, sales decks, uniforms, or partner materials.

Answer:

Priority order:

Tier 1

1. Product Packaging

2. Plotter Machines

3. Retail Point-of-Sale Branding

4. Website

Tier 2

5. Distributor Presentations

6. Product Brochures

7. Social Media

Tier 3

8. Apparel

9. Event Branding

10. Corporate Materials

72. What are the requirements for kiosks or vending machines?

Share available dimensions, construction materials, screen sizes,viewing distance, lighting, placement, interaction flow, maintenance constraints, and any supplier specifications. Attach drawings or photographs if available.

Answer:

For the initial phase, the primary focus is retailer-operated GuardXel plotter installation stations within mobile retail environments.

The identity should work effectively in:

- High-traffic retail stores
- Electronics shops
- Large-format consumer electronics chains
- Future kiosk formats

The system should support scalability into standalone kiosks, airport locations, malls and premium retail environments in the future.

73. What packaging needs to be designed?

List each product/SKU, package format, dimensions, required labels, materials, print constraints, barcode or QR-code needs, and any mandatory information. Attach dielines if available.

Answer:

Initial packaging scope:

Film Products

- GuardXel Shield
- GuardXel Edge
- GuardXel Titan

Application Variants

- Clear
- Matte
- Privacy

Device Categories

- Mobile

- Tablet
- Laptop

Future Scope

- Tempered Glass
- Device Assurance Plans
- Mobile Accessories
- Premium Protection Services

Packaging should create a highly recognisable shelf presence while maintaining a coherent master-brand structure.

74. What marketing and sales materials are needed?

List required items such as business cards, brochures, social templates,product sheets, retail displays, partner presentations,advertisements,
or launch assets. Mark priorities.

Answer:

Priority materials:

Critical

- Retail sales presentation
- Distributor presentation
- Dealer onboarding kit
- Product brochures
- Product specification sheets

Important

- Social media templates
- Product launch creatives
- Retail display materials
- Product comparison charts

Future

- Trade-show assets
- Brand videos
- Training materials

75. What digital touchpoints are in scope?

Describe any website, landing page, kiosk interface, app, e-commerce listing, email, or social media requirements. Clarify whether the need is for brand styling, design, or development.

Answer:

Immediate Requirements

- Corporate website
- Product showcase pages
- Distributor information pages
- Retail partner information pages
- Contact and enquiry system

Strategic Digital Roadmap

- Store locator
- Warranty registration portal
- Service claim system
- Consumer registration platform
- Retailer application portal

Long-Term Vision

A fully integrated GuardXel protection ecosystem connecting consumers, retailers, service partners and future protection programs under a single digital platform.

11. Project Logistics, Approvals & Success

76. Who are the key stakeholders, and who has final approval?

List names or roles, responsibilities, and the person who will consolidate feedback.

Answer: Self

77. What is the desired launch date and timeline?

Include important milestones, events, manufacturing deadlines, partner approvals, or location launch dates.

Answer: Mid February or March 2027

78. What deliverables are the highest priority, and are there any scope constraints?

Confirm the essential outputs, quantities, formats, and any items that are optional or out of scope. Flag anything that needs a separate quote or agreement.

Answer:

The highest immediate priority is the development of a trademark-ready logo system and foundational brand identity.
The identity must be scalable enough to support:
Product packaging
Plotter systems
Retail environments
Digital platforms
Future service and assurance programmes
The objective is to build a timeless brand asset capable of supporting long-term growth rather than short-term product launches.

79. What would make you approve or reject a creative direction?

Describe the criteria you will use to judge the work. What must the identity achieve, and what would make it feel wrong?

Answer:

The chosen direction must create immediate distinction within a highly crowded marketplace. GuardXel should feel bold, memorable and premium while remaining accessible and trustworthy.
The identity should communicate confidence, protection and modernity without relying on industry clichés.
A direction would be rejected if it feels generic, interchangeable with existing accessory brands, excessively technical or unable to support the long-term ambition of becoming a category-leading device protection ecosystem.

80. Is there anything else we should know before research and creative direction begin?

Share any context, concerns, assumptions, non-negotiables, unanswered questions, or information not covered above.

Answer:

Trust. Precision. Protection. Confidence.

Everything else, including films, plotters, warranty programmes and future technology, should appear as evidence supporting those four pillars.

That consistency will dramatically improve the quality of the branding outcome.

Materials to Share Alongside Your Answers

Use this checklist to gather any available materials. It is fine if some items are not available yet.

- [ ] Existing company or product presentation
- [ ] Product specifications and compatibility list
- [ ] Product photographs, prototypes, or demonstrations
- [ ]

- [ ] Current logo, packaging, or marketing materials
- [ ] Competitor names and links
- [ ] Customer feedback, research, or sales insights
- [ ] Brand name rationale and any naming documentation
- [ ] Kiosk/vending machine drawings, dimensions, or supplier specifications
- [ ] Packaging dielines, sizes, and print requirements
- [ ] Legal, regulatory, certification, warranty, and product-claim requirements
- [ ] Launch locations, rollout plan, and key dates
- [ ] Relevant partner, retailer, airport, metro, or mall requirements
- [ ] Any visual references you like or dislike
